IEP - International Engineering Program

OFFERED BY SR UNIVERSITY IN PARTNERSHIP WITH INTERNATIONAL UNIVERSITIES

Why should you opt for an International Engineering Program?

- A better question to ask is, "Why not?"
- "Travel is the only thing you buy that makes you richer"? That's exactly why you should do it.
- When you study abroad, you have the opportunity to learn about another culture firsthand, form global friendships, and practice a foreign language. The unique challenges you face will help you grow personally, gain a better understanding of the world, and improve your job prospects after graduation.
- You'll return home as a global citizen who is more independent, mature, and tolerant of cultural differences.
